 PRODUCT: TRADITIONAL, CHAPEL RED
 ARCHITECT: KENNEDY NOLAN
 PHOTOGRAPHER: DEREK SWALWELL

Iconically Australian

Born in Melbourne, with its subtly-textured faces and crisply-defined edges, Nubrik encapsulates the colours, qualities and lifestyle that Australians have come to admire.

This carefully selected, premium collection of pressed bricks are used in prestigious homes and buildings throughout the country, and will instantly create a look and feel that will never grow old.

Authentic design

Originality is an essential quality of style. Nubrik has remained true to its core principles for close to a century, and produces rich colour blends, found only in genuine pressed bricks. This gives Nubrik an air of glamour and sophistication, making it a versatile architectural choice, able to fit looks both classic and contemporary.

100 YEAR
 PRODUCT
 WARRANTY

peace of mind *guaranteed*

Nubrik bricks are backed by an exclusive Brickworks 100 year warranty.

Designed to last

LOW MAINTENANCE

No need to paint or other treatments to maintain their aesthetics and durability. They are strong, reliable and relatively maintenance free.

EXPANSIVE RANGE

Brick's natural colours and textures enable you to create both striking façade contrasts and more traditional neutral colour schemes.

SUPERIOR STRENGTH

Clay products are stronger than concrete and other light weight materials and also provide a safer and more secure home from the outside environment.

AFFORDABLE

Cost effective building product materials that increase the value of your investment or project from day one, for generations to come.

ENERGY EFFICIENT

Combined with intelligent passive building design elements, clay bricks can help moderate building temperatures and reduce energy consumption.

SUSTAINABLE

Clay is a natural resource which has been used for centuries because it retains its colour forever as well as its durability. Architects, engineers and specifiers continue to appreciate the advantages of using clay products.

Style inspiration

NUBRIK HAVE THE INSPIRATION AND EXPERTISE YOU NEED

With our comprehensive series of colour and style palettes, skillfully curated from the huge range of Brickworks building materials available, you can select a thoughtful and stylish scheme for any house, whether it's cutting edge contemporary or more traditionally influenced. Just as important, clay is a natural resource which has been used for centuries because it retains its colour forever as well as its durability.

Our expert design consultants can talk you through colour and style swatches in a friendly one-to-one session, helping you pick a scheme you love for your vision.

COLOUR SCHEME: ROUGE

New Arrivals

PRODUCT: LANEWAY, BRUNSWICK BLUE

Lanerway

Inspired by the character and rustic charm of Melbourne's famous back streets and laneways – where pressed bricks such as these are plentiful and inviting – Lanerway is not only a tribute to the craft of Australian brick making, but also a thoroughly modern design statement.

With their inner city character and sometimes bold colour variations, this double sided brick can show manufacturing marks and kiln burns that reflect the age-old authenticity of the materials. Made using traditional presses, each brick has an authentic look and a genuine presence to give an age-old grounding to even the most contemporary of applications.

NUBRİK

HOSIER LANE, MELBOURNE

Lanerway Custom Blends

Lanerway Bricks are ideally suited for blending on site for a custom “remastered” look. Designers can choose from two or more of the base brick colours , adding blacks and whites as desired for the individual blend they prefer. Packs of individual products will be delivered and bricklayers can blend from the packs for the desired effect. The bricks are double sided, usually with heavier markings and character on the back. Fronts and backs can be blended as desired for the right effect for each project.

We recommend a small dry stack wall of 1 – 2m² be laid out as a reference panel for each blend.

WEATHERED WHITES AND BLACKS

These bricks are an accessory product to be blended on site with one of the Lanerway bricks. The white and black colour is a fired on clay based colour that varies from full to only partial coverage. The colour is on the face only of a red brick and any excess bricks can be laid back out as one of the red bricks in the blend.

Weathered Whites

Weathered Blacks

Blend 1
Typical red based blend
For an order of 8000 bricks
the following packs will be delivered

Base Bricks	%	Packs
Weathered Red	85%	17
Weathered Whites	10%	2
Weathered Blacks	5%	1

Blend 2
Stronger character, higher contrast blend
For an order of 8000 bricks
the following packs will be delivered

Base Bricks	%	Packs
Warehouse Red	55%	11
Fitzroy Blend	15%	3
Brunswick Blue	15%	3
Weathered Whites	10%	2
Weathered Blacks	5%	1

Premium pressed brick collection

HONESTY, INTEGRITY AND VISION

For almost a century our brick presses have been moulding the solid, authentic pressed bricks that make up this premium selection. With their crisply-defined edges, these honest bricks exude quality and will maintain their appeal and durability for generations to come. Their traditional elegance, rich colour blends and subtle face textures are characteristics acknowledged by discerning architects, builders and home-owners.

Artisan

Nubrik Artisan draws inspiration from Victoria's frosty alpine environments with their palette of cool grey contemporary winter hues. This range combines a modern grey colour palette with the traditional quality and cachet found in genuine pressed brick. Suitable for both external facades that make a bold statement or as moody internal features, the Nubrik Artisan range perfectly complements modern living, style and design.

Traditional

100 years is enough time to establish a tradition, and time enough to prove a point. For a century or more Nubrik's brick presses have been moulding solid, authentic pressed bricks in this premium selection. With their crisp, sharp edges Nubrik Traditional bricks exude quality and will endure for generations to come. Their elegance and honesty, rich colour blends and pressed face textures make them extremely popular with the discerning architect, builder and homeowner.

Tumbled

Nubrik's Tumbled brick range adds a further dimension of character to this quality collection. Every brick has a rustic, individual form where no two bricks are alike. The aris's and corners have a random soft rumble that create walls with line variation and movement. The effect is reminiscent of historical brickwork where brick imprecision is admired for its authenticity and charm.

Special shaped bricks

UNIQUE AND VERSATILE

Shaped bricks are used in conjunction with standard bricks to create distinctive architectural features, adding detail and appeal. Unlike polystyrene or fibreglass mouldings that are simply glued into place, shaped bricks are as durable and colourfast as conventional bricks and are available in a variety of colours.

Special shaped bricks

CB7 (RH)

CB10

CB9

CB15

CB47

CB SILL

PLINTH CB5, CB6, CB7

Used to extend base brickwork and form a decorative 'ledge' around a building. Can also create a bevelled course or wall capping.

SINGLE BULLNOSE CB9

Commonly used in window sills, as step treads, or as a user-friendly capping on a low retaining wall, brick seat or planter box.

SQUINT CB15

Allows brickwork to turn a 45-degree corner (eg. at a bay window) without interrupting the bond pattern or leaving an unsightly cut mark down the corner.

DOUBLE BULLNOSE CB10

Commonly used as a capping brick on freestanding walls and parapets. Also used in vertical applications such as garage entrance piers.

REVEAL CB47

Commonly used in wall openings, windows, and doors to add a bevelled edge feature.

CB SILL

Commonly laid vertically with a flush joint type to provide an angled sill detail under windows.

Mortex

MORTEX is a factory manufactured, quality assured premixed M4 rated mortar solution. Its consistency can save labour time, increase efficiency, remove the need for on site blending, and it is compliant with AS3700:2018. MORTEX takes the guess work out of mortar blending and reduces the potential for under strength, non compliant mortar use.

This can ultimately reduce potential liabilities, saving money and time on rectifications. With the adoption of ISO9001:2008 principles, the mortar constituents are accurately measured and blended in a controlled environment to ensure consistent, homogeneous mortar is produced on-site.

Mortar colour

White mortar is currently the most popular colour. This is made by mixing light coloured cement and white sand and results in a traditional brick and mortar look. Mortar can be coloured by adding powdered or liquid pigments to the mortar as it is being mixed by the bricklayer. It can also be tinted to

match the brick colour, giving a very even wall colour. Please confirm with your bricklayer what their mortar colouring offering is before making your final decision.

FOR MORE INFORMATION ON MORTEX PLEASE CONTACT US ON: 13-Brick (13-2742).

Mortar finishes

There are four common mortar finishes and these various finishes result in different shadow lines on the wall. A raked finish will create a deep shadow in the mortar joint. This brings out the horizontal lines of the brickwork (and the vertical lines to a lesser extent) and it is the most common finish. Ironed and struck joints also create shadow lines, but these are much finer and more subtle. A flush joint doesn't allow shadow lines to form at all, giving the wall a flatter, more unified look. Using a mortar colour to match the brick will take this a step further.

*All Nubrik Shaped Bricks are made to order.

EXP = EXPOSURE GRADE

Suitable for use in external walls exposed to aggressive environments, such as; areas subjected to salts in the soil, adjacent material or ground water, in coastal areas exposed to attack from windborne salt spray, or retaining walls subjected to fertilisers and ground salts.

SOLAR ABSORPTANCE RATING

In the design of energy efficient buildings, the architects and consulting engineers need to be able to calculate the heat loss or gain of materials used to construct these buildings.

For this reason, our product range has been categorised into three colour groups

Light (L) < 0.475

Medium (M) 0.475 - 0.70

Dark (D) > 0.70

to assist architects and consulting engineers with their calculations.
